Sujal Acharya

Control Systems Engineer

RESUME_1893

Location: Kanpur, Uttar Pradesh, India | Email: sujal.acharya.resume_1893@example.com | Phone: +91-00000-00000 (placeholder)
Total Experience: 13 years

PROFESSIONAL SUMMARY

Control Systems Engineer with 13 years of experience in control systems, using MATLAB, Simulink, PID Control, State-Space Models. Experienced in control design, stability analysis and measurable delivery outcomes.

TECHNICAL SKILLS

Skills: State-Space Models, Actuators, System Identification, Python, PID Control, MATLAB, Sensors, Signal Processing, Data Acquisition, PLC, Simulink, LabVIEW

Methods: Control design, Stability analysis, System identification

PROFESSIONAL EXPERIENCE

Lead Control Systems Engineer | GlideArc Solutions | Jan 2022 - Present

- Reduced nuisance controller alarms by 15% using filtering and threshold design
- Completed 366 controller verification scenarios with logged sensor traces
- Reduced steady-state control error by 21% after retuning controller gains
- Coordinated engineering design reviews, acceptance criteria and test evidence with cross-functional stakeholders.

Control Systems Engineer | WillowGrid Labs | Jan 2017 - Dec 2021

- Reduced steady-state control error by 39% after retuning controller gains
- Improved settling time by 24% under tested operating conditions

Associate Control Systems Engineer | ZenithTrail Technologies | Jul 2013 - Dec 2016

- Reduced nuisance controller alarms by 40% using filtering and threshold design
- Completed 695 controller verification scenarios with logged sensor traces

PROJECTS

Process Dynamics Model | Signal Processing, Data Acquisition, MATLAB, PID Control

- Identified state-space models using recorded step-response data.
- Documented acceptance criteria and evaluated the design using stability analysis and system identification.

Actuator Fault Monitor | Simulink, Python, MATLAB, Signal Processing

- Built residual-based detection checks and operator alerts.
- Documented acceptance criteria and evaluated the design using stability analysis and system identification.

EDUCATION

B.Tech in Electrical Engineering, Bayview Institute of Engineering, 2013

Relevant Methods: Control design, Stability analysis, System identification

CERTIFICATIONS

MATLAB Simulink Applications (2020)
